In this case, it is easy to get $(0,0,0)$. But, if the question is to find minimum of $(x^2+y^2+z^2)/xyz$, then how we could solve this using a standard approach like we do in the ...

In this way, you have to generate only a small fraction of all the codewords to find the minimum distance, and the idea can be generalized to any linear code. The first step then is to find a ...

2 For an even number of data their median minimizes the sum of the absolute deviations. As in our case the median equals 0 , the minimum is 6 .

What is the difference between minimum and infimum? I have a great confusion about this.

I'm searching for some symbol representing minimum that is commonly used in math equations.

The Extreme Value Theorem guarantees that a continuous function on a finite closed interval has both a maximum and a minimum, and that the maximum and the minimum ...

What is the difference between the minimum value and the lower bound of a function? To me, it seems that they are the same.

Terms "maxima" and "minima" are related to all types of maxima and minima, either local or global. Every local maximum is a maximum, every global minimum is a minimum.
