In 2022, Solar Cloth introduced a flexible photovoltaic fabric tested by the Yacht Club de Monaco, capable of feeding renewable energy back into the Club's grid.

Combining historic heritage and innovation, the project involves creating an artificial reef to enhance biodiversity, installing solar panels and energy and water efficient ...

Monaco, with its limited land area, can leverage France's vast territory to harness solar energy on a grand scale. Meanwhile, France furthers its ...

Monaco, with its limited land area, can leverage France's vast territory to harness solar energy on a grand scale. Meanwhile, France furthers its own renewable energy targets through this ...

Built on land reclaimed from the sea, Mareterra's installation of solar panels across all its structures showcases a forward-thinking approach to sustainable urban development. ...

Located in France, the photovoltaic park will harness solar energy to produce clean electricity for Monaco, reducing the principality's ...

Located in France, the photovoltaic park will harness solar energy to produce clean electricity for Monaco, reducing the principality's dependency on fossil fuels and its carbon ...

Our high-efficiency PV modules, marine-resistant structures, and smart hybrid energy systems help property owners, hotels, and developers maximize space, generate clean power, and ...
