---

In future, hydrogen and other fuels, inexpensive flow battery technology and thermal energy storage technologies are expected to become important, and could potentially become ...

A landmark 45 MW / 90 MWh battery project in Namibia begins procurement with World Bank backing.

Namibia has reached a major milestone in its renewable energy journey with the arrival of the first shipment for the Omburu Battery Energy Storage System (BESS) Project, ...

In December 2023, the country signed contracts for its first utility-scale battery energy storage system (BESS) - a 54MW/54MWh project at Omburu Substation [1] [2]. But why should the ...

According to the national utility NamPower, the shipment successfully arrived on Tuesday at the Port of Walvis Bay. The cargo includes eight specialized Power Conversion ...

Namibia is not yet self-sufficient, but the combination of grid-scale storage and transmission expansion is laying the foundation for a more resilient and renewable-driven ...

As the sun dips below the Kalahari dunes each evening, this lithium-ion and flow battery hybrid system kicks into gear, storing enough daytime solar energy to power 90,000 ...

Key contracts have been signed for the first-ever grid-scale battery storage project in Namibia, signifying the African country's dedication to modernising its energy infrastructure, according ...
