-----

This pioneering project is set to transform industrial energy use by replacing polluting diesel generators with a large-scale battery storage system powered by solar energy.

A new project called Advanced Clean Energy Storage has been launched in Utah by a consortium of partners including Mitsubishi Hitachi Power Systems to store energy in a salt cavern.

The 146MW Tanahu project isn't your grandpa's pumped storage. Its AI-powered turbines predict rainfall patterns using Himalayan glacier melt data, achieving 89% round-trip efficiency.

Representing Nepal at the launch were Nepali Ambassador Bharat Kumar Regmi, Gham Power CEO Anjal Niraula, and teams from Swanbarton and Practical Action. This ...

Gham Power, in collaboration with Practical Action and Swanbarton, has been awarded a project by the United Nations Industrial Development Organization (UNIDO) to ...

These projects play a crucial role in power system stability, peak demand management, and surplus energy utilization. They also enable Nepal to generate and ...

Employing innovative techniques within underground caverns, ADELE compresses and stores air during periods of excess energy, ...

Our role: As the lead organisation, Practical Action is implementing Nepal's largest smart battery energy storage microgrid. Combining innovative clean energy technology and a people ...
