How much does a 20 kW solar system cost?

A 20 kW solar panel system is enough to power a large home--but it'll cost you about \$55,000. Why trust EnergySage? Installing a solar panel system can save you tens of thousands of dollars over time, but the upfront costs aren't exactly chump change.

How much does a solar panel system cost?

Installing a solar panel system can save you tens of thousands of dollars over time, but the upfront costs aren't exactly chump change. In 2024, the average cost for a 20 kilowatt (kW) solar panel system hovers around \$55,000 before incentives, though actual prices vary depending on your location and installation specifics.

How much electricity does a 20 kW solar system produce?

A 20 kW solar panel system produces about 29,033 kWh of electricity annually, but the exact amount depends on where you live and how much sun you get. DIYing a 20 kW solar panel system usually isn't your best bet: You're much better off hiring a professional solar company for optimal results. How much does a 20 kW solar system cost?

Are solar panels a good investment in Arizona?

The average 20 kW solar panel system in almost-always-sunny Phoenix, Arizona produces about 35% more electricity than that same system installed in seasonally-sunny Boston, Massachusetts. (That said, you don't have to live in Arizona for solar to be a good option for your home. Solar is a smart investment wherever electricity rates are high).

While container prices stabilized, the ripple effect continues. A standard 40HC container that cost \$3,500 pre-2023 now averages \$4,200 - and that's before adding solar components. Pro tip: ...
