-----

Without energy storage systems, homes and buildings relying on solar power would only have access to electricity when the sun shines. Furthermore, any excess energy captured and ...

The facility was developed by German company J. v. G. Thoma and its subsidiary J. v. G. Jaha Energy in Pristina, Kosovo, and will look to supply the growing solar market in the region.

As Kosovo's capital balances economic growth with sustainability goals, new energy storage systems are becoming the backbone of its power infrastructure. Let's break down why this ...

Next-generation thermal management systems maintain optimal operating temperatures with 40% less energy consumption, extending battery lifespan to 15+ years. Standardized plug-and-play ...

The project concerns the development of a 100MWac solar photovoltaic power plant (120 MWp), located between Obilic and Fushe ...

The project concerns the development of a 100MWac solar photovoltaic power plant (120 MWp), located between Obilic and Fushe Kosova, in close proximity to Pristina, in ...

The project is an important milestone for the transition of the energy supply in the Western Balkan countries towards a sustainable electricity supply. This is the first large-scale photovoltaic ...

Designed as modular power hubs, these cabins store excess electricity from solar panels, wind turbines, or the grid, releasing it when demand peaks or supply drops.
