The Northwest Wind Resource and Action Center created this permitting toolkit based on industry best practices and positive examples already in place in the region.

These Codes provide for the construction of safe, resilient, and energy efficient buildings throughout New York State.

Technological advances, new business opportunities, and legislative and regulatory mandates are all contributing factors that drive the need for up ...

Can a multi-energy complementary power generation system integrate wind and solar energy? Simulation results validated using real-world data from the southwest region of China. Future ...

The sections provide objective information on wind energy basics and the processes, regulations, and other important considerations involved in siting wind farms.

New York State Codes, Rules, and Regulations (NYCRR) regarding NYSERDA on the Westlaw website.

Let's explore how solar energy is reshaping the way we power our communication networks and how it can make these stations greener, smarter, and more self-sufficient.

Throughout this section, we provide readers with an overview on the SEQR process, with step-by-step instructions for large solar projects and the background on SEQR regulations.
