Where does Romania import electricity?

Romania exports and imports electricity to and from neighboring countries, including Hungary, Bulgaria, Serbia, Ukraine, and Moldova, and is also part of the European Union's internal energy market, which aims to create a single, competitive market for electricity and gas across EU member states.

Who produces electricity in Romania?

State-owned enterprises such as Nuclearelectrica, Hidroelectrica, Termoelectrica, Hunedoara Energy Complex (CEH), and Oltenia Energy Complex (CEO) are the primary producers of power. According to the National Energy Regulatory Agency (ANRE), the energy output in Romania in 2022 was 53 TWh (terawatt-hour), while imports were 5.9 TWh.

How many power plants are in Romania?

The main electricity generation plants are state-owned: Cernavoda Nuclear Power Plant, 208 hydropower and pumping plants, and six coal-fired power plants. In June 2023, Romania produced 4.412 TWh of electricity.

Transmission of Energy

Does Romania have a nuclear power plant?

Romania has two operational nuclear reactors at the Cernavoda Nuclear Power Plant, which contribute a significant portion of the country's electricity, but also significant natural gas reserves and production facilities, making it a key player in the regional natural gas market.
