-----

All generation and energy storage facilities of 5 MW or larger in Romania will be required to secure grid access via annual auctions beginning January 2026. The country's ...

Econergy plans to equip every connected and ready-to-connect solar project in Romania with electricity storage capacity. The aim is to consolidate and expand its position in ...

With a peak capacity of 1.04 GW and a battery energy storage system (BESS) of 500 MW, the project is set to become Europe's largest hybrid solar power plant. Graniceri ...

Romania's solar and storage market is stronger than ever -- but also more mature. Developers who invest in technical accuracy, grid foresight and hybrid asset design ...

eBattery.Energy leads Romania's energy transition with 45 MW / 90 MWh battery storage systems, solving the critical gap between solar generation and grid stability.

Econergy plans to equip every connected and ready-to-connect solar project in Romania with electricity storage capacity. The ...

On 8 February, the Ministry of Energy of Romania announced the re-launch of its tender for battery energy storage projects and investments in the manufacturing sector for the ...

In an accelerating investment wave, companies in Romania are combining BESS with solar power, hydropower and wind power, or ...
