In this study, a novel 1D resistance model was established to evaluate the performance of a segmented thermoelectric generator (STEG) with variable properties, and ...

Achieving higher thermoelectric (TE) energy conversion output of TEG is a fundamental challenge that can be realized through testing a combinatorial approach of ...

Providing deeper insights into the optimal design of innovative segmented variable area leg thermoelectric generators by considering the mutual interaction of thermocouples in ...

By segmentation of different TE materials which operate optimally in each temperature range, this study aims at developing high performance segmented TEGs for medium-high (450 - 850 K) ...

In this work, we present a comprehensive optimization study of a concentrating solar segmented thermoelectric generator (CSSTEG) with variable area leg geometry.

In this study, we numerically investigate the heat transfer, thermal energy storage, and thermoelectric energy conversion in an STEG with PCMs (STEG-PCM).

In this study, a novel 1D resistance model was established to evaluate the performance of a segmented thermoelectric generator ...

To further enhance the performance of the multi-stage thermoelectric generator (TEG), this work conducts a comprehensive geometry and stage number optimization of a concentrating solar ...
