A Higher Wire system includes solar panels, a lithium iron phosphate battery, an inverter--all housed within a durable, weather-resistant shell. Our systems can be deployed ...

We adapt our reference design to fit customers' specific energy storage/power requirements and environmental conditions. We use modelling simulation to optimize system design for ...

This ambitious endeavor transforms a standard 20-foot shipping container into a high-capacity, modular, and off-grid power ...

Equipped with solar panels, diesel generators, R30 walls, and advanced HVAC systems, this container-based structure is going to be the lifeline for this community.

With its stackable and expandable architecture, it is easy to scale capacity and maintain. Safety and reliability are paramount, with maximum protection provided by the robust LFP battery and ...

Each solar-powered shipping container generator is transportable, securable, and can be fully customized to your specific needs, including hybrid and microgrid compatibility.

Battery storage for solar power is essential for the future of renewable energy efforts. As the market continues to grow, we expect the ...

The Battery Energy Storage System Guidebook contains information, tools, and step-by-step instructions to support local governments managing battery energy storage ...
