Although Porto's topography does not pose significant challenges for installing solar systems on a large scale, it's crucial to consider local environmental factors while designing these systems ...

When it comes on stream in 2025, the Fernando Pessoa plant, named after the Portuguese poet, will be able to supply enough clean, low cost, locally generated green energy ...

On 9 October 2021, the largest solar power plant in Portugal was inaugurated in Alcoutim. With an installed capacity of 219 MW, the power plant has 661,500 solar panels and can power the ...

More than 5,200 square meters of photovoltaic panels have been installed in 25 schools and four Porto City Council buildings as part of the Porto Solar project, launched in 2022.

The plant processes 390,000 tonnes of waste annually, generating 162,045MWh of electricity. 90% of the generated electricity is supplied to the public grid, serving 150,000 ...

The project covers 29 buildings, 25 of which are basic schools, with an expected installed capacity of 1MWp with an investment of around 1MEUR.

Solar photovoltaic production, carbon capture and diversification of energies produced from waste are among the priority initiatives under study for which Veolia will support ...

The Municipality of Porto has been investing heavily in the energy transition, with the installation of photovoltaic panels in several public buildings, through the Porto Solar project.
