How much solar energy does Ecuador have?

During 2018,Ecuador has a solar install capacity of around 26 MW,with an electricity generation capacity of nearly 41GWh. Ecuador's renewable energy contributes nearly 0.7% of the total energy mix.

When will Ecuador start constructing a solar power plant?

In 2023,the Energy Ministry released tenders for a 500 MW renewable block (wind,biomass,solar),400 MW Natural Gas Combined Cycle Power Plant (CCCP),and a Northeast Transmission System to supply the Ecuadorian oil system. From these tenders,only the Villonaco project has started construction as of August 2025.

How much electricity does Ecuador need?

Ecuador had a peak demand of 5,110 MW in May 2025,and according to CENACE,electricity demand grows by 360 MW every year. Ecuador's energy shortage could result in a recurrence of power outages,particularly in the dry season of September through December.
