What is Somaliland's telecommunications sector?

Somaliland's telecoms sector has been funded by entrepreneurs and backed by expertise from China, Korea and Europe, these nascent telecommunications firms offer affordable mobile phone and internet services that are not available in many other parts of the continent.

How does Somaliland's telecoms work?

Somaliland's telecoms consumers are able to make the cheapest local and international calling rates in the world. Customers can conduct money transfers and other banking activities via mobile phones, as well as easily gain wireless access.

Could a lack of standardization affect Somaliland's telecoms sector?

This lack of standardization in Somaliland's telecoms sector could potentially have serious repercussions for the sector and limit the ability of the state to broaden their tax revenues among Somaliland's leading operators.

How is telecommunications regulated in Somaliland?

Somaliland's Telecommunications Sector is regulated by the Ministry of Posts & Telecommunications based in the national capital, Hargeisa. On 13th June 2011, the House of Elders passed the law, without any amendments, on an overwhelming majority of 75 for, 1 against and none abstaining.

Satellite technology is playing an instrumental role in Somaliland. Based on 2002 prices, a VSAT-based asymmetrical 128/64 connection in any given location in Somaliland costs \$0.058 per minute. This assumes the connection is used 24 hours per day; seven days per week. The connection, and the associated costs, may be shared by several PCs to lower the "per minute charge" per PC. One tele-centre exemplified in Somaliland showed the rate per PC to be \$0.005 ...
