Key Figures & Findings: South Sudan is embarking on a significant renewable energy transformation, with a new solar-plus-battery storage (BESS) project to address the country's ...

A public-private partnership in South Sudan has launched the country's first major solar power plant and Battery Energy Storage System (BESS) in the capital Juba, where it is ...

Ezra Group, a South Sudan family-run conglomerate, on Monday announced the launch of a 20-MW solar power plant with a 14-MWh battery energy storage system in South ...

The Uganda-South Sudan interconnector will run from the recently completed Karuma hydropower plant to Juba. This project has ...

In March 2020, South Sudan's installed generation capacity was reported as approximately 130 MW. Most of the electricity in the country is concentrated in Juba the capital and in the regional centers of Malakal and Wau. At that time the demand for electricity in the county was estimated at over 300 MW and growing. Nearly all electricity sources in the country are fossil-fuel based, with attendant challenges of cost and environmental pollution. There are plans to build new generati...

Ezra Group launches a 20-megawatt solar power plant and a 14-megawatt-hour Battery Energy Storage System in South Sudan. The project developed and run by the Ezra ...

South Ossetia's Phase I bidding aims to deploy 120 MWh of battery storage capacity, addressing energy security challenges and enabling 24/7 renewable power supply. [pdf]

The Uganda-South Sudan interconnector will run from the recently completed Karuma hydropower plant to Juba. This project has received funding from the African ...
