Beacon Power is a pioneer and technology leader in the design, development, and commercial deployment of grid-scale flywheel energy storage. Beacon's proprietary designs are at the ...

While the initial investment in energy storage battery systems may be higher, they require no continuous fuel consumption and can last for more than 10 years, significantly lowering ...

The facility includes 200 flywheels and is managed by Beacon Power. Initial commercial operation began in January, 2011 and full output was reached in June, 2011. In this market, Beacon ...

Beacon flywheel systems are designed to require low maintenance and our modular architecture allows units to be self-contained so service issues have minimal system impact.

While the initial investment in energy storage battery systems may be higher, they require no continuous fuel consumption and can last for more than ...

When generated power exceeds load, the flywheel speeds up; when load exceeds generation, the flywheel is slowed to convert the energy for distribution. The plant will provide a response time ...

There are more than 400 flywheels in commercial operation today helping grid operators in NYISO, PJM and ISO-NE safely and efficiently balance power grid supply and demand to ...

At Beacon Power we are committed to providing utilities and system operators the best flywheel-based energy storage resources to help maintain a reliable, cost-effective and stable power grid.
