AGC manufactures glass-integrated solar cells that can also be used as glass building materials. In this issue, we take a closer look at how "power generation with glass" works.

Soto Solar España, an independent power producer in Spain is developing the largest solar power station in Spain with an installed capacity of 1GW. The storage facility will have a ...

But the sunlit uplands of solar have begun to overheat. Spain has built so much solar capacity that at certain times of day it produces far more electricity than it needs. Prices ...

Concentrating Solar Power (CSP) is used to generate clean electricity from the sun, normally at utility scale. It is particularly suitable for areas with ...

Spanish startup BlueSolar has unveiled a patented PV-CSP system that combines hybrid panels and thermal storage to deliver ...

Vidrala will construct a 12 MW solar PV power generation facility at its Crisnova glass manufacturing site in Caudete, Castilla La Mancha, Spain.

Vidrala is to construct a 12MW solar photovoltaic power generation facility at its Crisnova glass manufacturing site in Caudete, Castilla La Mancha, Spain. The solar facility will ...

One of the installations carried out by the Spanish company has been the installation of amorphous silicon photovoltaic glass in a building in Madrid. These twelve ...
