What is a global power supply battery cabinet?

Global Power Supply provides a full range of battery cabinets engineered to extend UPS runtime, protect sensitive loads, and maintain continuity in any environment. A UPS system provides immediate backup power during an outage. Paired with compatible UPS battery cabinets, your facility gains extended power capacity and greater resilience.

What does a battery cabinet power?

Battery cabinets are designed to hold batteries used to power an uninterruptible power supply (UPS) system. In the event of a power disruption or outage, the UPS system ensures that your devices continue to operate from the energy stored in the batteries in the battery cabinet.

Why do you need a UPS battery cabinet?

UPS battery cabinets also help balance power consumption by providing stored energy during peak demand periods, reducing strain on both the UPS and the electrical grid. Together, a UPS and its connected battery cabinet form a reliable, high-performance power protection system for industrial and commercial applications.

Who makes battery cabinets?

Global Power Supply offers battery cabinets from industry-leading manufacturers such as Toshiba and Narada, available in multiple configurations to match your specific operational needs. Because every facility's power requirements are unique, we can help tailor the number of cabinets, capacity, and layout to meet your space and runtime objectives.

There are many different options and accessories available, making every system unique and built to your site-specific needs. They can be ...

The Vertiv(TM) EnergyCore Li5 and Li7 battery systems deliver high-density, lithium-ion energy storage designed for modern data centers. Purpose-built for critical backup and AI compute ...

C& D experts with extensive knowledge of data center uninterruptible power supply (UPS) are ready to help you configure your backup system. Let us help you build your best turnkey ...

Battery cabinets are engineered for an uninterrupted power backup source to support the continuous operation of your critical facility.
