As we enter 2026, energy storage is the linchpin of sustainable development. These projects pave the way for a decarbonized future, but challenges like supply chain ...

These innovative CO2 batteries from Energy Dome promise long-duration energy storage for the grid, and reliable 24/7 clean power for data centers.

The California Energy Commission (CEC) has approved the Darden Clean Energy Project, the first to be fast tracked under its Opt-in Certification program. The CEC said that ...

Governor Janet Mills and Maine's congressional delegation announced today that the U.S. Department of Energy has awarded a \$147 million grant to develop the largest long ...

The California Energy Commission (CEC) has approved the landmark Darden Clean Energy Project (DCEP), set to become the world's largest battery energy storage facility.

Once built, DCEP will be the largest battery energy storage system in the world, highlighting California's leadership in clean energy innovation and infrastructure.

The United Arab Emirates is building the world's largest solar and battery storage project that will dispatch clean energy 24/7.

The project is in the advance stages of deployment at Khavda, the world's largest renewable energy plant. The project is being developed with cutting-edge lithium-ion battery ...
