The renewable energy landscape in Portugal is moving into a new phase, marked by stronger commitments from international investors ...

Spain and Portugal's unique geographic endowments--including ample opportunities for cost-effective renewable energy production and significant raw materials--as well as their mature ...

The Central Fotovoltaica Riccardo Totta, named after the father of the owner of the land on which it sits, is now Portugal's largest photovoltaic plant, producing 219 Megawatts of ...

The Tâmega Gigabattery Project - Europe's largest hydro-pumped storage system - combines water reservoirs with battery parks. Think of it as a giant ecological Duracell ...

Last year in the Tâmega river, the utility inaugurated Portugal's largest pumped hydroelectric storage complex, one of Europe's ...

Galp and Powin, a US based global energy storage integrator, completed the commissioning and injected the first electrons of stored energy to the grid from a utility-scale ...

The renewable energy landscape in Portugal is moving into a new phase, marked by stronger commitments from international investors and the integration of storage ...

The batteries will allow Galp to store the solar energy produced in periods of high generation, and to deploy it during periods of high demand, maximizing the energy's value.
