In this Aeon rooftop unit troubleshooting guide, we'll walk both building owners and HVAC technicians through what they can do to turn the air or heat back on.

I'm here to assist you in troubleshooting the issue with your Astro A50 X base station and to find a solution together. Let's collaborate to get it up and running again.

I'm sure I'll feel dumb when someone replies, but I can't figure out how to continue supplying power from the Power Base (outlets in bed) with the truck turned off.

If, after turning the Base Station Light setting off, you still see an LED light illuminated, that may indicate that the Wall Power Light setting is still on. When on, the back half of the Base ...

Follow a professional HVAC technician's systematic approach to diagnose and repair a Carrier rooftop unit with a tripped breaker and unusual 575V/480V transformer ...

Activate the remote control by lighting up the screen. 2. Press and hold the middle and down buttons simultaneously. 3. Wait for the control box to beep - reset successful! 4. Use the up ...

Step 1: Check the Status Light. Open the electronics box & check to see if the status light (outlined in red below) is flashing green. If it is flashing green, your base station is working. ...

The base station is USB powered so you may be connecting it to a port that provides passive power even when the PC is sleeping or off. Try switching to a different USB ...
