What is the energy demand in Tunisia?

The main energy demand is required in the residential sector (category "Other Sectors"), whereas only 26% of the energy is for industry use and 33% for the transport sector. Tunisia's electricity demand has increased to a significant extent, by more than twice the growth in the final energy demand (46% compared with 20%).

Why should Tunisia invest in Tereg?

"By fostering renewable energy development, TEREg will strengthen Tunisia's position in clean energy, creating economic opportunities and ensuring long-term energy security," said Alexandre Arobbio, World Bank Country Manager for Tunisia. "This project reflects our strong partnership with Tunisia and supports its sustainable development goals.

What is the energy access rate in Tunisia?

The figure visualises the distribution of the grid and the population density, but is not complete or up-to-date due to the reliance on historical data. The energy access rate of the local population in Tunisia is around 99.9%³⁶, although access to energy services does not necessarily mean that the supply is always available.

Can Tunisia build a reliable electricity supply?

We found that Tunisia can cost-effectively build a reliable electricity supply based on local power generation, with high proportions of solar and wind power. With an onshore wind potential greater than 30 times the projected 2050 demand and a solar potential greater than 100 times that demand, Tunisia has exceptional renewable energy potential.

Bitech's partnership with a Tunisia energy storage cabinet battery supply In Tunisia, the development of Battery Energy Storage Systems (BESS) is gaining momentum as part of the ...

Objectives: The aim of the technical study is to support the Tunisian government in its energy transition towards renewable sources by assessing the best configurations and ...

This project aims to improve the resilience of Tunisia's electricity system and transform it into a net exporter of electricity. This would significantly reduce the country's dependence on costly ...

Tunisia's Minister of Industry, Mines and Energy, Fatima Al-Thabat Shibb, has approved four solar projects with a combined capacity of 500 MW Battery Energy Storage ...
