What does Vietnam's Solar Policy update mean for energy storage?

Vietnam's solar policy update highlights growing role of energy storage. (Photo: iStock) Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems.

Do energy storage systems exist in Vietnam's power system today?

This paper provides an up-to-date review of these storage technologies and energy storage systems in Vietnam's power system today. Finally, there are a few perspectives on the opportunities and challenges of these storage systems in Vietnam power systems today.

Does Vietnam have new feed-in tariffs for solar power?

April 2025 | Southeast Asia Impact Alliance Vietnam is taking another step toward modernizing its renewable energy sector by unveiling updated feed-in tariffs (FiTs) for solar power, with a notable emphasis on encouraging battery energy storage systems (BESS).

What are the conditions for solar storage in Vietnam?

Conditions for systems with storage include a minimum storage capacity of 10% of the solar plant's installed capacity, a charge/discharge time of 2 hours, and at least 5% of total generation used for charging the storage system. Overall, projects with storage receive higher FIT rates. Previously, Vietnam's FiTs were relatively low.

Various projects across Vietnam demonstrate successful integration of solar hybrid storage systems. These case studies showcase innovative approaches, lessons learned, and best ...

Centralized photovoltaic (PV) projects paired with energy storage systems (like battery energy storage, or BESS) are at the heart of this transformation, driven by ambitious ...

Vietnam's energy storage race is like a game of Tetris: fast-paced, occasionally chaotic, but wildly rewarding if you slot the pieces right. With projects like GoodWe's Haiphong plant and VinES's ...

A strategic analysis of Vietnam's energy future: why Battery Energy Storage Systems (BESS) will decide enterprise competitiveness by 2026, and how SolarBK is shaping ...

This paper provides an up-to-date review of these storage technologies and energy storage systems in

Vietnam s new solar container energy storage system composition
