The Asia Pacific region plays a critical role in the global off-grid solar system market, driven by its vast population, growing industrialization, and rapid urbanization.

WEnergy led development of the Cabayugan's Sabang hybrid microgrid project, which will serve some 700 residents and customers, the company says. At its core is a 1.4-MW solar PV ...

We launched a new project to promote photovoltaic power generation systems for off-grid and semi-electrified areas. To realize that, we will develop easy-to-use photovoltaic power ...

China has brought a 1 GW offshore solar power plant online off the coast of Dongying, Shandong province, combining PV with energy storage and aquaculture in what is ...

Since DRE brings electricity generation and distribution close to the final consumer, its deployment creates local jobs and business opportunities (SDG8 - decent jobs ...

As global demand for energy independence and sustainable power solutions increases, off-grid solar systems are becoming a vital energy source for remote communities and regions lacking ...

Off-grid power generation is becoming more and more important for urban centres as they struggle with rising energy demands and the need to lessen their carbon footprint, ...

China has connected the world's first 1-GW offshore solar farm to the grid, a plant off Shandong set to generate 1.78 TWh per year.
