What is a genset container?

Genset containers, also known as generator set containers, are specialized enclosures meticulously engineered to house and safeguard generator sets. These purpose-built structures provide a controlled environment, shielding the generators from external elements such as harsh weather conditions, dust, and debris.

Which generator sets are best for refrigerated container units?

The most rugged, dependable and easy-to-operate generator sets for refrigerated container units. Carrier's industry-leading PowerLINE Generator Sets are designed and built for continuous, unattended operation for all refrigerated containers transported by road or rail worldwide.

Why are genset containers important?

These purpose-built structures provide a controlled environment, shielding the generators from external elements such as harsh weather conditions, dust, and debris. By ensuring optimal operating conditions, genset containers contribute to improved performance and extended lifespan of the power generation equipment.

What size generator container do I need?

Our generator containers for Type 2, 3, and 4 gas engines have a standard 40-foot length. Width and height depend on engine type, the application (power generation only or CHP) and ambient conditions. Customized sizes to accommodate special project requirements are available on request.

Containerised generators are diesel or gas-powered generators that are enclosed in a weather-resistant, soundproof ...

Jenbacher offers containerized generator sets based on our Type 2, 3, 4, and 6 gas engines. Leveraging the expertise acquired during several decades with more than 3,000 containerized ...

It serves as an independent source of energy, ensuring the continuous operation of the refrigeration unit within the container. Gensets are commonly mounted on the chassis of the ...

Simply put, dual packs are two parallel generators in one ISO container: Two 500 kW generators could be paralleled to achieve a 1000 kW output, or ...

SEA BOX's selection of generator sets can be connected to one or several refrigerated containers to provide reliable power with the need to connect to a local power source.
