Why should you choose Benning inverter systems?

With BENNING's INVERTRONIC compact range of inverters, the company offers highly reliable, cost-effective, single-phase, modular inverter systems which provide high-quality, maximum-reliability electrical power to the critical loads.

What is a rectifier / inverter system cabinet?

Rectifier / inverter system cabinet of reduced height, populated with inverter modules, "EUE" electronic bypass switch and manual bypass, together with rectifier modules. You get the most economical solution and benefit in the long term from the direct link to BENNING as the manufacturer.

What types of inverter modules are available?

The inverter modules are available for various input and output voltages, and the output power varies according to the voltage combination. INVERTRONIC compact inverter systems and their racks, comprising hot-swapping 1/5 19" rack modules with a range of 3 heights, are characterised by their modular architecture.

Can a bypass switch be installed in a cabinet?

At higher outputs, you can have a higher-power electronic bypass switch fitted in your cabinet. There is the option of switching the load to the bypass mains or to the inverter output, thanks to the manual bypass which is also housed in a 1/5, 19" rack module.

The cabinet accepts direct PV input via MPPT controllers, storing excess solar energy for later use. The EMS prioritizes "solar-first" logic, ensuring that daytime solar generation supports the ...

The cabinet supports AC220V, DC48V, and many other voltage output types with more advanced Energy Saving and Monitoring capability, thus it is suitable for edge sites and harsh ...

Batteries serve as the primary storage medium for electricity, while inverters convert stored DC power into AC power for use. The energy management system monitors, ...

Batteries serve as the primary storage medium for electricity, while inverters convert stored DC power into AC power for use. The ...

Base handles all service and maintenance for the lifetime of the battery. This is the amount of time it takes for the Base backup system to detect an outage and automatically switch your home to ...

Base handles all service and maintenance for the lifetime of the battery. This is the amount of time it takes for the Base backup system to detect an ...

With intelligent power-off function, remote control of each branch output on-off function; Photovoltaic, wind power generation, inverter output, 12V output, etc. can be configured ...

This Hisense 5P inverter air conditioner is designed for robust and continuous operation in demanding telecom environments. With advanced inverter technology and a 380V power ...
