What type of power outlet is used in Romania?

The power outlets used in Romania are type F and are commonly referred to as "Schuko plugs." They are the most common type of outlet in Europe. Type F outlets are compatible with Type C and E plugs that are also commonly found throughout Europe. In Romania, the electricity's standard voltage is 230 volts with a standard frequency of 50 hertz.

Where can I buy a power adapter for Romania?

There are many different types of adapters available on Amazon that can be used in Romania. You can purchase a universal adapter that will fit most outlets in the world, or you can purchase a specific adapter for Romania. -> Find travel adapters on Amazon. What Voltage and Frequency Are Used in Romania?

What type of plug do I need in Romania?

In North America, the standard plug types are Type A and Type B, with a voltage of 120V. Since Romania uses Type C and F outlets, you'll need a Type A/B to Type C/F adapter. Additionally, as the voltage in North America is different, you may also need a voltage converter for devices that are not dual-voltage.

What is the standard voltage of a power socket in Romania?

All power sockets in Romania provide a standard voltage of 230V with a standard frequency of 50Hz. You can use all your equipment in Romania if the outlet voltage in your own country is between 220V-240V. This is the case in most of Europe, Australia, the United Kingdom and most countries in Africa and Asia.
