Discover 5G coverage in the world: dynamic map using real-time on-the-field measurements from real users

NOTE: The information regarding Mauritania on this page is re-published from the 2024 World Fact Book of the United States Central Intelligence Agency and other sources.

The 5G base station is the core device of the 5G network, providing wireless coverage and realizing wireless signal transmission between the wired communication network and the ...

Mauritania has three operators, the original monopoly, Mauritel (now owned by Vivendi's Maroc Telecom), Mattel (owned by Tunisie Telecom) and Chinguitel, which started operating in December 2006. The country only has around 1000 DSL subscribers, and 300,0000 internet subscribers in total, out of a population of 4.5 million. Monthly DSL charges were high, around US\$30 per month, bu...

Approximately 1,700 km of fiber optic cable were deployed, connecting Mauritania to the Africa Coast to Europe (ACE) submarine cable -- significantly enhancing international ...

Infrastructure sharing was considered crucial for faster rollout of base stations across Mauritania's vast interior, much of which was difficult to access because of poor roads and lack of electricity.
