Nexans provides advanced cable technologies for power and data transmission. Nexans goes beyond cables.

Cable movement caused by rotor rotation in wind turbines is managed by using flexible cable mounts and abrasion protection systems that allow ...

HellermannTyton specializes in cable management solutions that boost the efficiency of the heavy duty systems found in wind power systems. We have been closely involved with the industry - ...

Ultimately, the best moorings & cable configuration for a floating wind project will be driven by site-specific conditions, where water depth, cable cross-section size, the use of ancillaries, ...

Avoid downtime and prevent cable failures with these expert cable management tips for wind turbines. Ideal for OEMs, field technicians, and energy companies driving clean, ...

Seawater, oil, ozone and UV resistance are not an option, but a necessity! HELUKABEL offers you optimal solutions for onshore and offshore wind ...

Certification is often required, however, for the whole cable system, so the cable protection system supplier may be required to provide a design verification report to the certification body.

The mechanical latch/connector should maintain the cable protection system in place for the specified design life of the system (unless retrieval of the cable / CPS is required to facilitate ...
