The Percepto Base is a ruggedized, field-proven drone dock for the Percepto Air drones, designed for remote operations and autonomous drone flight.

The OmniDock Standard is the first drone-agnostic docking station for multi-UAV operations. With a hemispheric, wind-resistant design, it accommodates one large or two smaller drones.

This paper contributes to the literature by presenting the concept, detailed design, realization, and tests of a prototype of a networked system of a set of autonomous docking ...

A shipping container solar system is a modular, portable power station built inside a standard steel container. A Higher Wire system ...

The system involves a drone station in the form of a shipping container that can receive, charge, and store drones. The station has ...

With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three ...

Discover the future of autonomous drone logistics with our groundbreaking Solar-Integrated Container Hangar, engineered exclusively for vertical takeoff and landing (VTOL) fixed-wing ...

With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three hours. Go big with our modular ...
