How much does a wind turbine cost?

**Dramatic Cost Range:** Wind turbine costs span from \$700 for small residential units to over \$20 million for offshore turbines, with total project costs varying from \$10,000 to \$4,000+ per kW installed depending on scale and location.

Are commercial wind turbines a good investment?

**Commercial Projects Offer Best Economics:** Utility-scale wind turbines at \$2.6-4 million each provide the most attractive financial returns with 5-10 year payback periods and capacity factors of 25-45%, significantly outperforming residential systems.

Are offshore wind turbines a good investment?

However, offshore turbines benefit from stronger, more consistent winds that can deliver capacity factors of 45-65%, significantly higher than onshore alternatives. Understanding the total cost of wind turbine ownership requires examining both initial capital expenditures (CAPEX) and ongoing operational expenditures (OPEX).
